SUGGESTIONS *for* SPRING PLANTING 1926

The Bay State Nurseries
W. H. Wyman & Son
North Abington, Mass.

Just a Word

E HAVE growing in our nurseries in North Abington and adjoining towns a very large stock of trees, shrubs and vines, both deciduous and evergreen, as well as an unusually large list of hardy perennials and rock plants. What many of our customers appreciate most, is the fact that they can come here and get the hardy trees and plants for the different requirements they may have, knowing that we grow very nearly all of the established varieties for which there is a demand, as well as many of the newer sorts.

This small book cannot begin to cover the varieties of trees, shrubs, vines, roses and hardy plants that we grow. These will be found in our spring price list, a copy of which will be gladly sent you if you have not already received one. This book is intended to present some varieties of plants to your mind that may be of interest to you, and to call to your attention a large stock of plants we have in our nurseries.

Our business has shown a steady increase year after year, except during the war years when we did very little. And the Bay State Nurseries is now one of the leading, if not the very largest nursery in New England. We have had the pleasure of serving many of our customers year after year, and the fact that we advertise very little indicates that our customers have been speaking for us, which after all is the best kind of advertising.

Mr. Windsor H. Wyman started The Bay State Nurseries in 1894, and it is through his efforts that the nursery covers such a large acreage and has such splendid equipment with which to do business. In 1910 he purchased the Framingham Nurseries at Framingham, Massachusetts, and operated the two nurseries separately, until 1920, when he sold the Framingham Nurseries to Richard M. Wyman, his elder son. At about the same time he took his younger son, Donald D. Wyman, into partnership with him at The Bay State Nurseries, and the firm name is known as W. H. Wyman & Son. We are not in any way identified with any other nursery in which the name Wyman appears, but are the oldest and largest nursery organization which is owned by a Wyman. There seems to be some confusion, and that is why we have put in this word of explanation. We are on the very best terms with all these other concerns, and have frequently occasion to buy from them, as they also buy from us.

Our trade mark has always been "Value for Value," and we know that the business has been built up by giving good value in trees, shrubs and vines for the money that we have received, and as long as we are in business we shall continue to do so.

THE BAY STATE NURSERIES

W. H. Wyman & Son

NORTH ABINGTON, MASS.

Evergreens — For Foundation Planting

THE two plans we have suggested are for the average home owner, with a house of moderate size. If your house is larger, or the architectural design varies considerably, by all means consult a Landscape Architect, if you are really desirous of obtaining the best landscape effect.

We are not Landscape Architects, and we do practically no planting. However, for the convenience of many in our immediate vicinity who may wish to know the actual cost of this material delivered and planted around their homes, we have consulted local plantsmen, who have quoted as follows: Delivering and planting of evergreens for small house, within a ten mile radius from North Abington — \$24.00; twenty mile radius — \$29.00. Delivering and planting evergreens for house of moderate size (either small or medium sized plants) within a ten mile radius from North Abington — \$35.00; twenty mile radius — \$40.00. These prices are based on favorable soil conditions. Should the soil be poor or rocky, it might be slightly more than this.

The varieties we have recommended are not cheap or fast growing, but are a collection of moderate growing varieties that will be satisfactory for several years to come, and at a reasonable price for quality stock.

Foundation plantings are often made at a cost much less than we have outlined, but it has been necessary usually to use cheap, fast growing evergreens that within two or three years grow out of proportion with their surroundings. Do not use Spruces or Firs at the front of a house, unless the windows are high above the ground, because they grow too rapidly.

This *suggestion* contains only eleven varieties, whereas we have over eighty varieties and a number of sizes of each variety to offer. All are carefully listed in our spring price list.

Before Planting

After Planting

Description of Varieties

Pyramidal Arborvitae (*Thuya pyramidalis*). Of very distinct, columnar growth; very densely branched and with a foliage of a rich, dark glossy green, which does not change appreciably in color during the winter months.

Hovey Arborvitae (*Thuya hoveyi*). A moderate growing variety, of low globular form, with foliage of a golden tinge.

Ware Arborvitae (*Thuya wareana*). A very hardy, slow growing variety, with steel gray foliage. One of the very best varieties of Arborvitae.

Japanese Yew (*Taxus cuspidata*). A very hardy plant, with rich, dark green foliage; habit of growth is spreading.

Plumed Cypress (*Chamaecyparis plumosa*). A tree with soft, feathery foliage, light green in color, very graceful in habit of growth. To be kept at its best it should be sheared in the middle of June.

Sulphur-Plumed Cypress (*Chamaecyparis plumosa sulphurea*). Is similar in habit to the Plumed

Cypress, but the color is a rich, golden color, which is very desirable to use as a contrast with the more sombre shades of green.

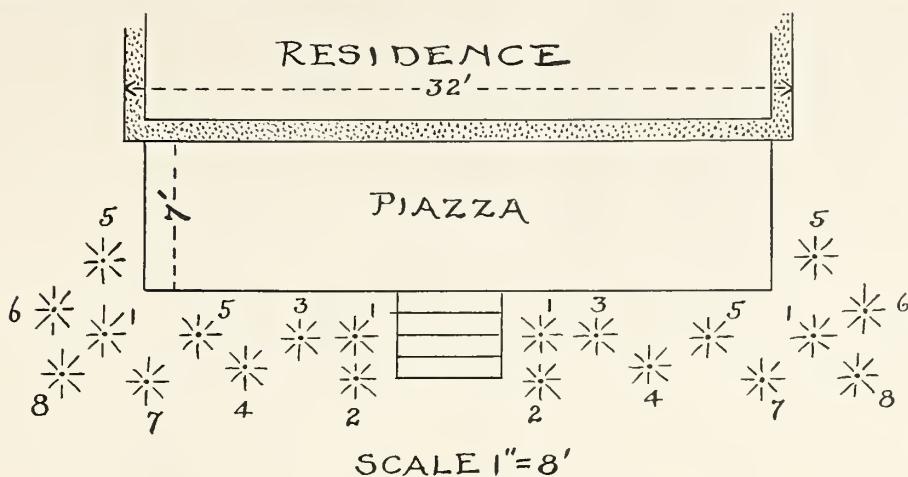

Obtuse Cypress (*Chamaecyparis obtusa*). Is a little larger growing than the other varieties, with a very rich, dark green foliage.

Pfitzer Juniper (*Juniperus pfitzeriana*). A beautiful fan-shaped evergreen, grows about as broad as tall; foliage is a grayish green color. The plant is exceedingly hardy, and will thrive under conditions that are not the most favorable.

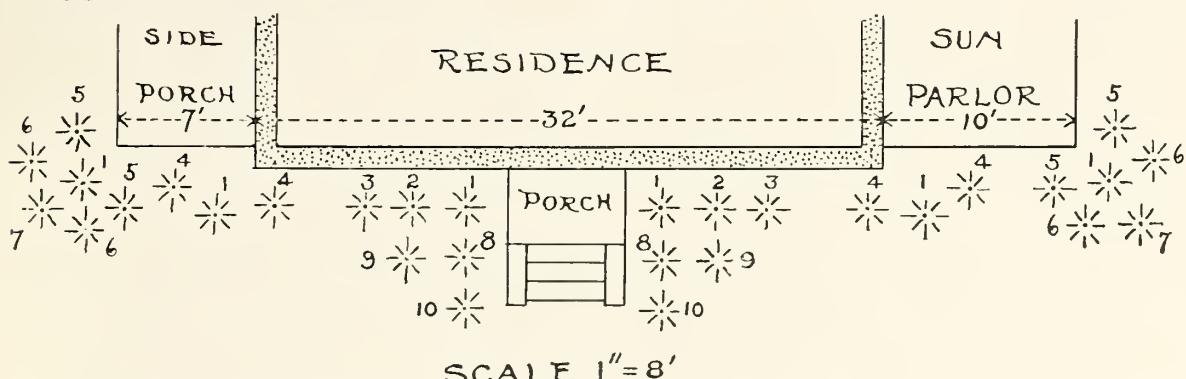

Canada Hemlock (*Tsuga canadensis*). A broadly pyramidal, medium sized tree of dense growth, with green foliage. The branches have a drooping tendency, which gives the plant a graceful effect. When used in foundation plantings, it should be trimmed slightly in June each year.

Drooping Leucothoe (see page 4 for description).

Mountain Andromeda (see page 4 for description).

Suggested Foundation Planting for Small House

Key	Quantity	Variety	Size	
1	4	Pyramidal Arborvitae	3 ft. @ \$5.00	\$20.00
2	2	Sulphur Plumed Cypress	18 in. @ 3.00	6.00
3	2	Obtuse Cypress	2 ft. @ 4.00	8.00
4	2	Canada Hemlock	2 ft. @ 3.50	7.00
5	4	Plumed Cypress	2 ft. @ 3.50	14.00
6	2	Drooping Leucothoe	15 in. @ 2.00	4.00

Total cost 30 high grade Evergreens in medium size \$111.80 In small size \$95.00

Prices are for stock F. O. B. North Abington, Mass.

Kalmia and Evergreens

Broad Leaved Evergreens and Rhododendrons

Mountain Laurel (*Kalmia latifolia*). An evergreen shrub with large glossy green leaves, producing an abundance of flowers the latter part of June. It is very hardy and will thrive in poor soils or in partial shade.

18 in. plants **\$2.75** each; 2 ft. plants **\$3.25** each.

Mountain Andromeda (*Pieris floribunda*). A dwarf low growing shrub producing a quantity of flowers resembling the Lily of the Valley. Blossoms in early spring, is very hardy and has rich green foliage.

12 in. spread **\$3.00** each; 15 in spread **\$4.00** each;
18 in. spread **\$6.00** each.

Drooping Leucothoe (*Leucothoe catesbeiae*). A native evergreen shrub desirable for its foliage, which is a shining green in summer and a rich bronze in winter. Is perfectly hardy and has creamy white blossoms.

15 in. plants **\$2.00** each; 18 in. plants **\$2.50** each.

Native Rhododendrons

Rhododendron Carolinianum. The blossoms of this Rhododendron are smaller than most varieties, but they are produced in an abundance and appear about two weeks earlier than the others,

which make this variety a very desirable one. The flowers vary from light to deep pink.

18 in. **\$3.00** each; 2 ft. **\$3.50** each.

Rhododendron Catawbiense. The hardiest of the Rhododendrons. Has rich green foliage, and produces a large number of large blossoms in various shades of lilac purple in early June.

12 to 18 in. bushy plants **\$2.50** each;
2 ft. plants **\$3.00** each.

Rhododendron Maximum. Flowers rosy white to white produced in late June and July. Foliage very thick and smooth.

12 to 18 in. bushy plants **\$2.50** each;
2 ft. plants **\$3.00** each.

Let us quote you on larger sizes as well, or consult our spring price list, which gives a complete list of the stock we have to offer together with prices on large quantities.

We will furnish one of each of the 6 Evergreen Shrubs listed above in the smaller size mentioned for **\$15.75** and one each in the next larger size for **\$19.25**.

Prices are F. O. B. North Abington, Mass.

Japanese Pachysandra

Varieties of Wintercreeper and a Heather

Moss Heather (*Calluna nana*). A new variety of heather which grows in a small tuft or compact clump. The foliage is dark green and the little plant is most attractive. Especially good for rockeries. Clumps 6 in. in diameter **75¢** each.

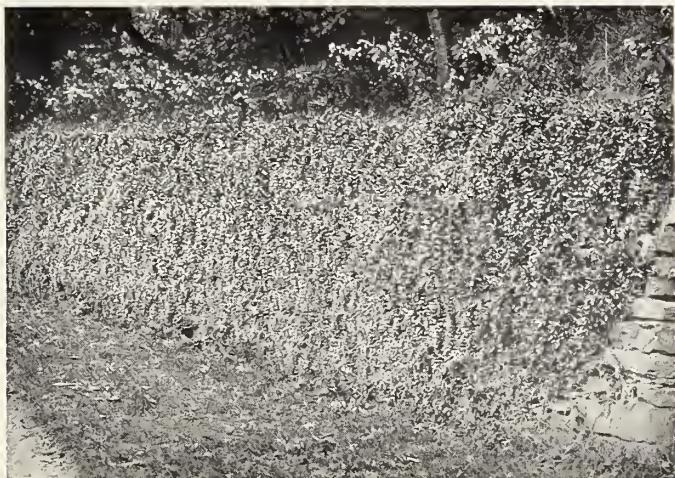

Wintercreeper (*Euonymus radicans*). A low procumbent shrub with small evergreen leaves. The picture above shows how the plants will grow over a wall. It is also good for use as a ground cover.

3 year old plants **50¢** each;
5 or more **45¢** each.

Glossy Wintercreeper (*Euonymus radicans carrieri*). A stronger grower than the preceding variety with larger ovate glossy green leaves. Half bush and half vine in habit of growth. If given support it makes a very fine covering for a building or a wall. It is often planted on either side of a walk and if given a little trimming it makes a splendid low evergreen hedge.
3 year old plants **75¢** each; 5 or more **60¢** each.
4 year old plants **\$1.00** each; 5 or more **80¢** each;
5 year old plants **\$1.75** each; 5 or more **\$1.60** each.

Bronze Wintercreeper (*Euonymus radicans colorata*). A new variety introduced by the Arnold Arboretum, the foliage of which is bright red during the winter months. A rapid grower.
4 year plants **\$1.25** each; 5 or more **\$1.10** each.

Bigleaf Wintercreeper (*Euonymus radicans vegetus*). A low trailing evergreen shrub with round leaves. Produces an abundance of orange scarlet berries in the fall. Splendid for use as a

Wintercreeper (*Euonymus radicans*) growing over a stone wall

ground cover, or filling in on the borders of evergreens.

2 year plants **50¢** each; 5 or more **45¢** each.

3 year plants **75¢** each; 5 or more **60¢** each.

4 year plants **\$1.00** each; 5 or more **80¢** each.

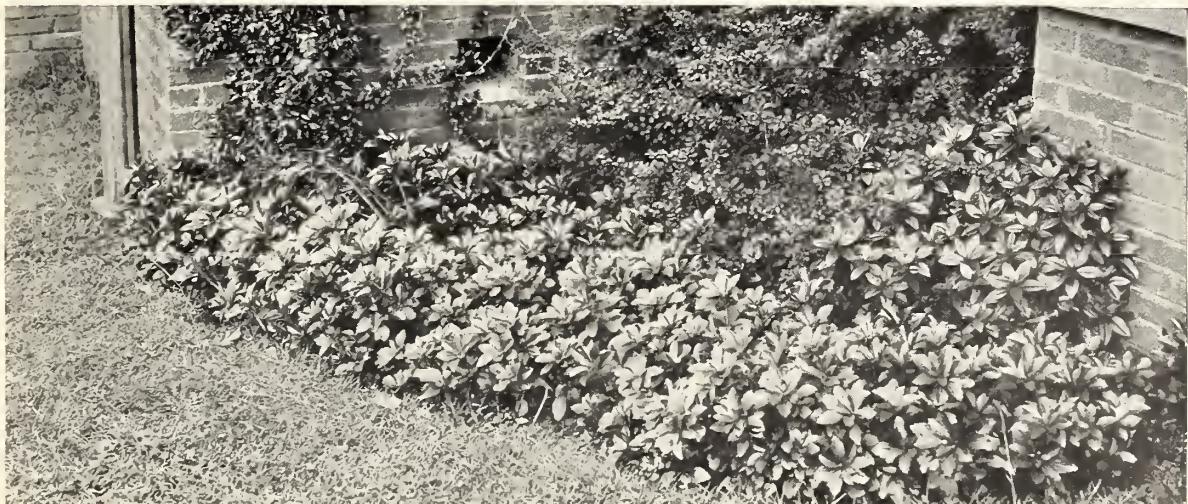

Japanese Pachysandra (*Pachysandra terminalis*). A low growing evergreen plant with white flowers in short spikes in May and June. A splendid evergreen ground cover with attractive dark green leaves, valuable for planting in shady places where grass will not grow, and for bordering beds of evergreens.

Plants grown in $2\frac{1}{2}$ in. pots **25¢** each.

\$2.00 per ten; **\$12.00** per 100.

Field grown plants **35¢** each.

\$2.50 per ten; **\$18.00** per 100.

Japanese Pachysandra (*Pachysandra terminalis*) used as a border plant around shrubbery

Trees for a Variety of Uses

Western Catalpa (*Catalpa speciosa*). A tall hardy open headed rapid growing Catalpa.

6 to 8 ft. **\$1.25** each.
8 to 10 ft. **1.50** each.

White Ash (*Fraxinus americana*). One of our native trees with straight clean trunk, soft green foliage, very desirable as a street tree because it gives shade quickly and yet is comparatively long lived.

8 to 10 ft. **\$1.50** each.
12 to 14 ft. **2.50** each.

Bechtel Crab (*Malus ioensis plena*). This is one of the most beautiful of the flowering Crabs producing double fragrant flowers of delicate pink.

3 to 4 ft. **\$2.00** each.

Carolina Poplar (*Populus eugenei*). This is not a long lived tree but is a splendid tree where shade is wanted quickly. Foliage bright green. This tree grows rapidly in almost any soil.
8 to 10 ft. **\$1.50** each. **\$12.00** per ten.
10 to 12 ft. **1.75** each. **15.00** per ten.

Lombardy Poplar (*Populus nigra italicica*). This is the well known rapid growing tree of pyramidal form with branches clear to the ground. It is one of the best trees used as a screen.

8 to 10 ft. **\$1.50** each. **\$12.50** per ten.
10 to 12 ft. **2.00** each. **18.00** per ten.

Purpleleaved Plum (*Prunus pissardi*). A handsome small tree, purple leaves, wine red fruit, foliage very brilliant during the summer and retaining its color until fall.

5 to 6 ft. **\$2.50** each.

Pin Oak (*Quercus palustris*). A very handsome tree for lawn planting; grows rapidly.
12 to 14 ft. **\$4.50** each.

Weeping Willow (*Salix babylonica*). One of the best known Willows with drooping slender branches; foliage olive green; grows best planted near a stream or lake. 6 to 8 ft. **\$1.50** each.

Laurel Willow (*Salix pentandra*). This is a tree

5 trees of one variety will be priced
at the rate per 10

we sell in large quantities every year. The growth is dense, foliage dark glossy green very attractive. It is another splendid tree to use for screening and will thrive almost anywhere.

5 to 6 ft. **90¢** each. **\$8.00** per ten.
6 to 8 ft. **\$1.00** each. **9.00** per ten.

American Linden (*Tilia americana*). A rapid growing tree, develops into a broad round top making it desirable for lawns, parks and streets.

8 to 10 ft. **\$2.50** each.

American Elm (*Ulmus americana*). One of our most common trees and at the same time most beautiful.

8 to 10 ft. **\$2.25** each.

Boxelder (*Acer negundo*). This is a splendid tree to use for making a quick screen. It is a rapid grower and has spreading branches; although it thrives best in rich, damp ground, it will grow in dry or poor soils. The foliage is light green and changes to yellow in the autumn.

8 to 10 ft. tall **\$2.00** each. **\$17.50** per ten.

Norway Maple (*Acer platanoides*). This is one of the best trees for street and shade planting. A rapid, vigorous grower which develops into a large, handsome tree with round, spreading head.

8 to 10 ft. **\$3.00** each.

Red Maple (*Acer rubrum*). A tree of excellent habit with scarlet flowers in early spring and brilliantly colored foliage in the autumn, which will thrive in wet situations where no other maple would live.

6 to 8 ft. **\$2.00** each. **\$18.00** per ten.

Sugar Maple (*Acer saccharum*). A great tree for street and shade planting. A large growing tree like the Norway maple but somewhat higher headed. Has dense foliage turning bright yellow and scarlet in the autumn.

8 to 10 ft. **\$2.50** each.

Canoe Birch (*Betula papyrifera*). This is an attractive tree with loose graceful head and large, handsome leaves. When small the trunk is brown but as the tree develops the color changes until it is white. 5 to 6 ft. **\$1.50** each. 6 to 8 ft. **\$2.00** each.

The shade trees we offer here are all of moderate size. Plant a few of these trees now and see how rapidly they develop in only a year or two.

Our price list will show you that we can furnish all these trees in larger sizes as well.

Native Shrubs

Although there has always been some demand for native shrubs, it has been only within recent years that they have been really appreciated. We have found considerable call for many of these desirable varieties, and we are therefore taking a page of this booklet to mention ten particularly good varieties. The native shrubs that we offer are all nursery grown; do not confuse them with collected plants.

Downy Shablow (*Amelanchier canadensis*). A shrub or small tree; the leaves and flower stalks densely white, wooly when young; showy white flowers in April.

2 to 3 ft. tall **60¢** each. **\$5.00** per ten.

Red Chokeberry (*Aronia arbutifolia*). A beautiful, densely-branched shrub, bearing clusters of white flowers in May, followed by extremely ornamental red berries, which remain on the plant until early winter.

2 to 3 ft. tall **60¢** each. **\$5.50** per ten.

3 to 4 ft. tall **75¢** each. **6.50** per ten.

Summersweet (*Clethra alnifolia*). A shrub with rich green foliage and spikes of fragrant creamy white flowers in August and September. It will thrive in shady, damp places, where not many shrubs will grow.

2 to 3 ft. tall **60¢** each. **\$5.00** per ten.

3 to 4 ft. tall **75¢** each. **6.50** per ten.

Common Witch-Hazel (*Hamamelis virginiana*). This shrub is unusual in that the showy yellow flowers appear after the ripening of the leaves in November, when other shrubs are dormant. It will thrive in partial shade.

3 to 4 ft. tall **75¢** each. **\$6.50** per ten.

Common Winterberry (*Ilex verticillata*). An ornamental shrub with upright branches and light green foliage, conspicuous for its clusters of bright scarlet berries, which cling to the branches well into the winter.

2 to 3 ft. tall **60¢** each. **\$5.50** per ten.

3 to 4 ft. tall **75¢** each. **6.50** per ten.

Rhodora (*Rhodora canadensis*). A dwarf shrub covered with rosy purple flowers in May; thrives in most places, but will do well in other locations.

12 to 15 in. tall **\$1.60** each. **\$15.00** per ten.

15 to 18 in. tall **2.00** each. **18.00** per ten.

Prairie Rose (*Rosa setigera*). A rapid growing, native climbing rose, which if left to grow in a natural way without support, will rise three or four feet in height, then arch and bend over, with the tips trailing on the ground, which makes it very attractive. The flowers vary from deep to pale pink and appear in June and July.

2 to 3 ft. tall **40¢** each. **\$3.50** per ten.

3 to 4 ft. tall **50¢** each. **4.00** per ten.

Highbush Blueberry (*Vaccinium corymbosum*). A shrub forming large handsome clumps, with bunches of white flowers in May, followed by edible fruit in August. In the fall the foliage of this plant becomes a most brilliant scarlet and holds its leaves late into November. (This shrub is unusually heavy and if more than two or three are to be sent on an order, we would recommend having them shipped by freight; the other varieties can be shipped by express if desired).

2 to 3 ft. tall **\$1.25** each. **\$11.00** per ten.

3 to 4 ft. tall **1.50** each. **14.00** per ten.

Withe-Rod (*Viburnum cassinoides*). This plant is an inhabitant of northern swamps, but will thrive in other places as well. An upright growing shrub with creamy white flowers in June, followed by dark blue fruit in September.

2 to 3 ft. tall **60¢** each. **\$5.00** per ten.

3 to 4 ft. tall **75¢** each. **7.00** per ten.

Arrowwood (*Viburnum dentatum*). A compact shrub with glossy green foliage, white flowers in June; crimson berries turning blue in autumn. One of the best shrubs for landscape planting, and like other Viburnums this variety will flourish in partial shade.

2 to 3 ft. tall **60¢** each. **\$5.00** per ten.

3 to 4 ft. tall **75¢** each. **6.50** per ten.

Remember that 5 or more plants of one kind will be priced at rate per ten.

In addition to owning one of the finest spraying outfits (A Fitzhenry-Guptil Sprayer mounted on a two ton truck chassis which cost \$6600.00) we maintain an inspector formerly in the employ of the State of Massachusetts, who attends to the spraying at the proper season and also inspects all stock before it is shipped. Our customers are in this way assured of receiving clean stock, free from any injurious insect pest or disease.

We cellar practically no stock, in other words, we dig in the field fresh plants for each order. This is a little more expensive way of filling orders than to cellar everything, but from past experience we find it most satisfactory, as plants not only start growing quicker, but are much more likely to transplant satisfactorily.

We sell at retail and wholesale, but employ no agents whatever. We depend entirely on satisfied customers for more business from year to year.

Japanese Barberry Hedge

Hedge Plants

Each year we sell several thousand hedge plants, mostly for planting around private residences, but frequently we have calls for large quantities for parks, cemeteries and large estates. We are always glad however to receive orders from small as well as large buyers and our stock is sufficient so that we can serve both satisfactorily. Our plants are well grown and bushy. We are listing below six varieties that we consider the best to obtain a good hedge. With all of these varieties plants should be set at the rate of one plant to one foot of ground, in other words, a space of 75 feet will require 75 plants. We allow the hundred rate on forty or more plants of one kind.

Japanese Barberry (*Berberis thunbergi*) is one of the best growing shrubs for a hedge in New England and other Northern States. The plant is not only hardy but attractive. The foliage is of a rich green in the summer and in the autumn becomes very bright colored. The fruit is equally showy. The stock is well grown and very bushy.

	Each	Per ten	Per hundred
12 to 15 in.	.25	\$2.00	\$12.00
15 to 18 in.	.35	3.00	15.00
18 to 24 in.	.50	4.00	22.50

Amur Privet (*Ligustrum amurense*). This is a splendid tall growing upright variety of privet and very hardy variety.

	Each	Per ten	Per hundred
2 to 3 ft.	.40	\$2.50	\$18.00
3 to 4 ft.	.50	3.50	24.00

Ibolium Privet (*Ligustrum ibolium*). This is a new hardy privet. It is a cross between Ibota and California privet, having the rich glossy green leaf of the California and the bushiness as well as the hardiness of the Ibota. This is a new variety and one that is going to be more popular each year. We are offering it this season for the first time.

	Each	Per ten	Per hundred
2 to 3 ft.	.40	\$3.00	\$24.00
3 to 4 ft.	.50	4.50	30.00

Ibota Privet (*Ligustrum ibota*). An older variety still very much in demand not only for hedges but for specimen and mass plantings as well. It has branches spreading and curving and is much more bushy than any of the other varieties.

	Each	Per ten	Per hundred
2 to 3 ft.	.40	\$3.00	\$18.00
3 to 4 ft.	.50	4.50	27.00

California Privet (*Ligustrum ovalifolium*). California privet is one of the most commonly used hedge plants. The foliage is very attractive. It is not hardy for planting in Northern New England although in Southern Massachusetts, Rhode Island and Connecticut and States South of New England it is very satisfactory.

	Each	Per ten	Per hundred
18 to 24 in.	.20	\$1.50	\$8.00
2 to 3 ft.	.25	1.80	10.00
3 to 4 ft.	.30	2.20	12.00

Rugosa Rose (*Rosa rugosa*). This shrub makes a desirable flowering hedge particularly at the seashore. There it seems to thrive on the salt air. The foliage is shiny dark green, flowers single and red and produces flowers during the summer months. The fruit is bright crimson scarlet and very showy.

	Each	Per ten	Per hundred
18 to 24 in.	.50	\$4.50	\$33.00
2 to 3 ft.	.60	5.00	36.00

Japanese Creeper or Boston Ivy growing on masonry

Vines

The following are but 5 varieties taken from the 35 sorts we grow and offer this year.

Japanese Creeper (*Ampelopsis tricuspidata*). Better known as Boston Ivy. Splendid for growing on stucco, brick, or masonry, to which it will cling without support. The foliage is very glossy and in the fall turns to a brilliant orange and scarlet.

The plants we offer are grown in 3 in. pots and have their tops tied to bamboo stakes.

75¢ each; 5 or more 70¢ each.

Dutchman's-pipe (*Aristolochia siphon*). Well known vine with the large heart shaped leaves which make it desirable for screening purposes.

3 year old plants \$1.50 each.

Sweet Autumn Clematis (*Clematis paniculata*). One of the best fall blooming vines. Has fine

foliage and a profusion of pure white, fragrant, feathery blossoms.

3 year old plants 60¢ each; 5 or more 50¢ each.

4 year old plants 75¢ each; 5 or more 60¢ each.

English Ivy (*Hedera helix*). This is really an evergreen vine with very glossy rich green leaves. It is not generally hardy in New England but thrives on Cape Cod, Southern Rhode Island and Connecticut and states South of New England. Grown in 3½ in. pots with tops 2 to 3 ft. long. 60¢ each; 5 or more 55¢ each.

Hall Japanese Honeysuckle (*Lonicera halleana*). A vigorous growing vine with fragrant yellow and white flowers.

3 year old vines 50¢ each; 5 or more 35¢ each.

English Ivy growing on chimney

Great Silverbell

Twenty-Five Shrubs of Value

Our spring price list contains over 200 varieties of flowering shrubs. From among these we have selected 25 that will give a variety both in flower and foliage throughout the season.

There are spots around many a home that would be made more attractive by planting a few shrubs. Glance over this list and see how much you can really obtain for ten dollars or less. Our shrubs are well grown, and what we offer are of good size, not little shoots.

For the average planting, they should be set out about three feet apart. If a double row is used, plant the front row alternately between the plants in the back, and only about a foot and a half or two feet in front. Dwarf or slow growing plants especially good for the foreground are marked with (D).

Tartarian Dogwood (*Cornus alba*). A shrub with erect stem, good clean foliage, and bright blood red branches.

3 to 4 ft. 60¢ each; 5 or more 50¢ each.

Flowering Quince (*Cydonia japonica*) (D). One of the first shrubs to bloom. A plant with spreading, spiny branches, glossy leaves, and flowers which vary from light pink to deep scarlet.

2 to 3 ft. 90¢ each; 5 or more 80¢ each.

Slender Deutzia (*Deutzia gracilis*) (D). A low dense shrub with slender branches bearing pure white flowers.

15 to 18 in. 60¢ each; 5 or more 55¢ each.

Lemoine Deutzia (*Deutzia lemoinei*). Another early shrub; a vigorous grower producing quantities of pure white flowers.

3 to 4 ft. 75¢ each; 5 or more 70¢ each.

Great Silverbell (*Halesia tetraptera*). The beautiful large white bell shaped flowers, borne in profusion in May, make a distinctive effect not equaled by another shrub.

3 to 4 ft. \$1.00 each; 5 or more 90¢ each.

Fortune Forsythia (*Forsythia fortunei*). One of

the earliest shrubs to bloom, having deep yellow flowers in profusion.

3 to 4 ft. 50¢ each; 5 or more 40¢ each.

Snowhill Hydrangea (*Hydrangea arborescens grandiflora*) (D). This shrub is particularly valuable because it blooms from the last of June until the middle of September — a time when there are not many other shrubs in bloom. The flowers are large and the color is pure white. This is a shrub that does well in either sunny or shady positions.

2 to 3 ft. 75¢ each; 5 or more 65¢ each.

Hydrangea Pee Gee (*Hydrangea paniculata grandiflora*). A description is not necessary because it is the common hydrangea with the pine-apple shaped blossom which blooms in the late summer and fall. The flowers are large and white, turning later to pink and red.

2 to 3 ft. 75¢ each; 5 or more 65¢ each.

Tartarian Honeysuckle (*Lonicera tatarica*). A shrub (not the Honeysuckle Vine) bearing a profusion of pink flowers in June, followed later in the summer by a quantity of light red berries.

3 to 4 ft. 50¢ each; 5 or more 40¢ each.

Twenty-five Shrubs of Value (Continued)

Morrow Honeysuckle (*Lonicera morrowi*). Branches are wide spreading; leaves dark green above and grayish beneath; creamy white flowers in May and June.

3 to 4 ft. 50¢ each; 5 or more 40¢ each.

Sweet Mockorange (*Philadelphus coronarius*). Shrubs with upright branches and pure white fragrant flowers in June.

3 to 4 ft. 50¢ each; 5 or more 40¢ each.

Golden Mockorange (*Philadelphus foliis aureus*) (D). A graceful dwarf variety with bright yellow foliage which retains its color throughout the season.

15 to 18 in. 75¢ each; 5 or more 70¢ each.

Jethead (*Rhodotypos kerrioides*). A fragrant shrub bearing snowy white flowers in May, followed by shining black berries.

3 to 4 ft. 90¢ each; 5 or more 80¢ each.

Rugosa Rose (*Rosa rugosa*). The stems of this shrub are densely covered with prickles; foliage is shining dark green; flowers single, red and fragrant, produced freely throughout the summer; fruit bright scarlet.

2 to 3 ft. 60¢ each; 5 or more 50¢ each.

Froebel Spiraea (*Spiraea froebeli*). This shrub is not unlike Anthony Waterer Spiraea. It is a little large growing and the flowers last longer and are brighter. One of the newer shrubs.

3 to 4 ft. 60¢ each; 5 or more 55¢ each.

Garland Spiraea (*Spiraea arguta*). A strong growing Spiraea with white flowers early in May.

3 to 4 ft. 50¢ each; 5 or more 45¢ each.

Anthony Waterer Spiraea (*Spiraea Anthony Waterer*) (D). A very free-blooming compact shrub, with bright crimson flowers in the early summer.

18 to 24 in. 50¢ each; 5 or more 45¢ each.

Thunberg Spiraea (*Spiraea thunbergi*). A very

graceful shrub with feathery foliage, and abundant white flowers in May.

3 to 4 ft. 75¢ each; 5 or more 60¢ each.

Vanhoutte Spiraea (*Spiraea vanhouttei*). This spiraea makes a round graceful bush which is covered late in May or early June with beautiful white flowers.

3 to 4 ft. 50¢ each; 5 or more 45¢ each.

Common Snowberry (*Symphoricarpos racemosus*). Smooth shrub, with slender branches, usually bending under their load of white waxy berries which appear in the autumn.

2 to 3 ft. 50¢ each; 5 or more 40¢ each.

Coralberry (*Symphoricarpos vulgaris*). Of more compact growth than the above; spreading, graceful habit. The flowers are greenish red and succeeded by dark purplish red berries in clusters.

2 to 3 ft. 50¢ each; 5 or more 40¢ each.

European Cranberrybush (*Viburnum opulus*). The flowers of this splendid shrub are not particularly showy, but the large red berries which remain from fall until early winter are very attractive.

3 to 4 ft. 75¢ each; 5 or more 65¢ each.

Variegated Weigela (*Weigela variegata*) (D). A dwarf shrub with green leaves with white edges. Flowers are light rose.

2 to 3 ft. 60¢ each; 5 or more 50¢ each.

Pink Weigela (*Weigela rosea*). One of the showiest shrubs with rose colored flowers in June.

3 to 4 ft. 60¢ each; 5 or more 50¢ each.

Eva Rathke Weigela (*Weigela Eva Rathke*) (D). Flowers are a brilliant crimson, blooming more or less all summer.

2 to 3 ft. 75¢ each; 5 or more 70¢ each.

1 each of 5 varieties of spiraeas \$2.85

5 each of 5 varieties of spiraeas 12.50

1 each of above 25 shrubs 16.00

The prices listed here are for the plants, carefully packed and delivered to the freight or express office at North Abington, Mass. During the shipping season we are shipping trees, shrubs, evergreens, etc. to many states outside of New England, and the material is so packed that it reaches the customer in good condition.

Pinxter Bloom (*Azalea nudiflora*)

Native Azaleas

All of the following varieties of Native Azaleas are hardy and very ornamental. The varieties are arranged in the order of their blooming.

Pinxter Bloom (*Azalea nudiflora*). Flowers vary from deep pink to reddish purple, and appear in May before the leaves appear, or just as they unfold.

15 to 18 in. **\$2.25** each; 18 to 24 in. **\$2.75** each.

Flame Azalea (*Azalea calendulacea*). The Flame Azalea is the most showy of the American Azaleas. The flowers vary from orange yellow to flame red. 18 to 24 in. **\$2.50** each; 2 to 3 ft. **\$3.00** each.

Sweet Azalea (*Azalea arborescens*). The flowers are white with pink stamens and appear after the leaves are nearly full grown. Foliage dark green, very fragrant.

18 to 24 in. **\$2.50** each; 2 to 2½ ft. **\$3.00** each.

Swamp Azalea (*Azalea viscosa*). This Azalea blooms during the latter part of June, or July. Has small fragrant flowers which are pure white and covered with hairs.

18 to 24 in. **\$2.25** each; 2 to 2½ ft. **\$2.75** each.

We can furnish one plant of each of the above plants in the smaller size, for **\$9.50** or one of each of these plants in the larger size as listed above, for **\$11.50**. Each plant will be carefully labeled and carefully packed.

Our spring price list contains a larger list of azaleas, as well as the different sizes and prices in quantity. If you have not already received a copy, we will gladly send one on request.

Gladiolus Bulbs

Our list of Gladiolus Bulbs is not long, but includes a number of splendid varieties in an assortment of colors. The Gladiolus Bulbs that we offer are all of good first class flowering size.

	Each	Per Ten
Baron Hulot , Deep violet blue	.20	\$1.50
Diana , Very handsome red, strong grower	.25	2.40
Empress of India , Rich dark red	.20	1.50
Flora , Beautiful golden yellow	.25	2.00
Gretchen Zang , Soft pink shading into salmon, tall spikes	.20	1.50
Herada , Pure mauve	.20	1.50
Lily White , Pure white	.20	1.50
Marshal Foch , A variety of the finest salmon pink, with many giant flowers opening at		

	Each	Per Ten
one time. Do not confuse this with the Dutch variety Le Marechal Foch	.50	\$4.50
Mrs. John Hays Hammond , A beautiful begonia rose, blending into a rich carmine red	.50	4.50
Mrs. Watt , Deep brilliant wine color	.20	1.50
Prince of Wales , Beautiful light salmon on orange shade	.25	2.00
Schwaben , A pure canary yellow, shading to soft sulphur yellow	.20	1.50

Comparison of flowers of *Philadelphus Virginal* and *Coronarius*

A Number of Interesting Plants

Hugonis Rose ("Golden Rose of China"). A new species introduced only a few years ago that has proven a very satisfactory variety. It is perfectly hardy and produces long arching sprays of single, soft, yellow blossoms in May. It makes a beautiful symmetrical bush about six feet high, and is very satisfactory when used as either a lawn specimen or in a planting with other shrubs. We offer strong 2 year old plants at \$1.25 each.

Fragrant Viburnum (*Viburnum carlesi*). A few years ago we had a number of these plants, but the demand was so great we sold them all and have had none to offer until this spring. The buds of this Viburnum appear in the autumn and develop in May. Produces large corymbs of beautiful rosy white flowers, changing to pure white, when fully opened. Flowers exhale a delicious fragrance. Plants 18 to 24 in. \$1.75 each; 2 to 3 ft. \$2.25 each.

Philadelphus Virginal (New Hybrid Mock-orange). The accompanying cut shows the difference in the size of the blossoms of this plant and the common sweet Mockorange. This new hybrid produces clusters of pearly double white flowers, about two inches across, and is very fragrant.

2 ft. shrubs \$1.25 each.

We strongly urge all who are planning any landscape work, to consult a landscape architect. His experience with plants and the conditions under which they may have to be planted, will enable you to obtain the landscape effect you desire, in the quickest and most satisfactory way. Write to any one of the following for a list of landscape architects, and then consult some architect who may be in your immediate vicinity.

The following are the Secretaries of the various chapters of the American Society of Landscape Architects:—

Secretary of Boston Chapter—Mr. Robert W. Beal, 185 Devonshire Street, Boston, Mass.

Secretary of New York Chapter—Mr. Gilmore D. Clarke, 7 Benedict Place, Pelham, N. Y.

Secretary of Ohio-Michigan Chapter—Mr. Arthur L. Munson, 1864 East 83rd Street, Cleveland, Ohio

F. J. Grootendorst Rose (*A Hybrid Rugosa Rose*). A comparatively new rose that is very desirable. It is a hybrid rugosa very hardy, and producing a quantity of beautiful small, bright, crimson flowers in clusters, from early in the summer continuously until frost. We recommend planting a few with other flowering shrubs.

Strong 2 year old plants at \$1.00 each.

Rock Cotoneaster (*Cotoneaster horizontalis*). "Although no longer a novelty, *Cotoneaster horizontalis* is one of the most useful and interesting of the Chinese species of *Cotoneaster*. It is a low plant with spreading and arching stems which in time form a broad mat not more than a foot high. The small leaves are dark green and very lustrous; the minute flowers are dark red, and these are followed by innumerable small red fruits. This is a most desirable plant for the borders of a small shrubbery, for the rock garden and for covering low walls." (Arnold Arboretum Bulletin No. 50). We can furnish plants 10 to 12 in. spread at \$1.25 each; 12 to 15 in. spread at \$1.50 each.

Rockspray (*Cotoneaster microphylla*). Another trailing shrub, shiny, dark green leaves; flowers white, followed by scarlet berries.

Plants 10 to 12 in. spread \$1.00 each; 12 to 15 in. spread \$1.25 each.

A Perennial garden always has something in bloom from June to October

Hardy Perennials

At our Perennial department we are growing one of the largest collections of herbaceous plants to be found in this country. We find each year that the so called old-fashioned flowers are in greater demand. We are continually striving to add to our list, varieties that are really of value.

For the convenience of the layman we have made a small list of Perennials, that gives a variety in color, time of flowering, and habit of growth.

Perennials are always very attractive whether planted as borders in formal gardens, or planted to give a natural effect. They are also of great value as cut flowers. For other varieties of Perennials, consult our price list.

	Each	Per Ten		Each	Per Ten

100 Perennials for \$20.00

We will furnish an assortment consisting of 5 plants of each of 20 varieties of perennials making 100 plants altogether of our own selection for \$20.00.

Remember that one plant of a kind will not make a garden. To obtain a good effect it is usually necessary to use five plants of a kind, and this should usually give a clump of color.

It is better to use fewer kinds and more of each kind than a large assortment of one each, because such a great assortment is likely to give a salt and pepper effect.

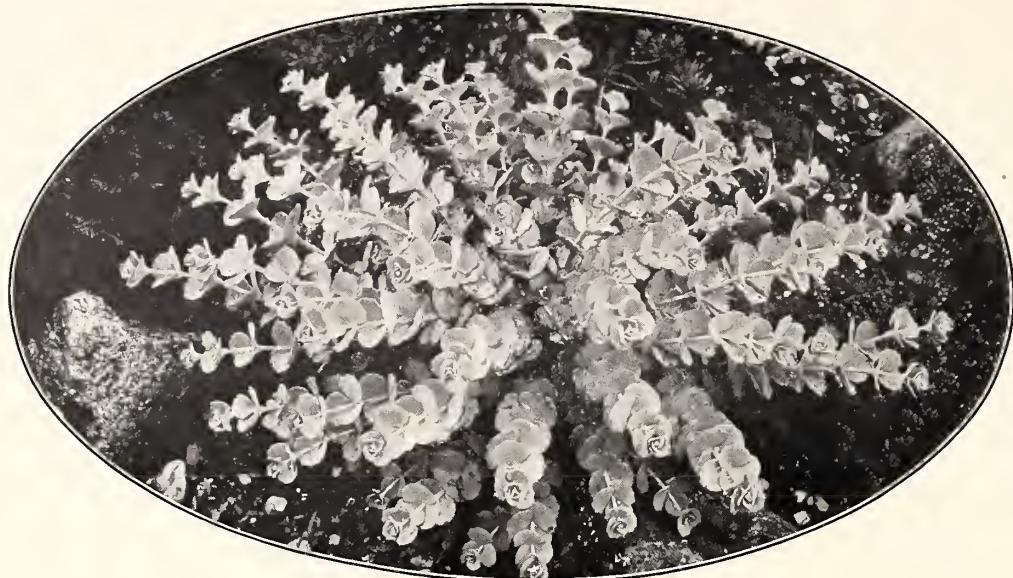

Have you visited our perennial dept? We invite you to do so. Those who have been by our perennial department when the Phlox are in bloom will not forget the sight.

Our office and shipping headquarters are at 678 Adams Street, North Abington, Mass., about one mile north of the car line and railroad station, and less than a mile from the main highway running from Quincy to Bridgewater and the Cape.

Our perennial department however is located on North Avenue, between North Abington and Rockland.

To get the best results, prepare your beds before you plant perennials, by mulching them with manure and spading them. The hardy Lilies however do not like any dressing and take care not to give them any. If you want to protect the beds during the winter months, give them a light covering of hay, straw, or leaves, but do not mulch them with manure in the fall, because it will cause the crowns to rot and some varieties will be worthless in the spring. In the spring they may be mulched without injury.

Iris and Peonies may be transplanted in the spring; they will not bloom the first season after planting, however. If the Iris are transplanted during the summer, and Peonies during the fall, they will very likely bloom the following spring.

Sedum sieboldi—Siebold Stonecrop

A List of Hardy Perennials Particularly Adapted for the Rock Garden.

So many folks want to make a rock garden and do not know what varieties to use, we have therefore made the following list, which includes only a small number of the varieties we have to offer, but offers good assortment.

	Each	Per Ten		Each	Per Ten	
<i>Achillea tomentosa</i> (<i>Wooly Yarrow</i>)	.25	\$2.20	<i>Lychnis viscaria</i> fl. pl. (<i>Double Rosepink Campion</i>)	.30	\$2.40	
<i>Adiantum pedatum</i> (<i>Maidenhair Fern</i>)	.30	2.40	<i>Mertensia Virginica</i> (<i>Virginia Bluebells</i>)	.30	2.40	
<i>Ajuga reptans rubra</i> (<i>Purple-leaf Bugle</i>)	.30	2.40	<i>Oenothera missouriensis</i> (<i>Ozark Sundrops</i>)	.35	3.00	
<i>Alyssum saxatile compactum</i> (<i>Dwarf Golden-tuft</i>)	.25	2.20	<i>Pachysandra terminalis</i> (<i>Japanese Pachysandra</i>) (2½ in. pots)	.25	2.00	
<i>Aquilegia caerulea</i> (<i>Colorado Columbine</i>)	.30	2.40	<i>Papaver nudicaule</i> (<i>Iceland Poppy</i>) Orange, white and yellow	.30	2.40	
<i>Aquilegia canadensis</i> (<i>American Columbine</i>)	.25	2.20	<i>Phlox amoena</i>	.30	2.40

Viola G. Wernig, Dark blue flowers
12 varieties, 3 plants each, 36 plants for \$10.00
12 varieties, 5 plants each, 60 plants for 14.00

An attractive rockery

Sempervivum tectorum, the largest of the species

Sedum acre—“mothering” a Sempervivum or Houseleek

New Alpine Plants

There is an increasing interest in Alpine plants in American gardens, and this is evidenced somewhat by the large gathering in Horticultural Hall in Boston (just before this booklet went to the printer) to hear M. Henri Correvon, the foremost authority on Alpine plants, give an illustrated lecture about them.

We are very glad to offer the following list of new varieties of rock plants which we have to offer this season for the first time. We regret that space does not permit a description.

We suggest that you buy a dozen or two of these plants and thereby add some new varieties to your rock garden.

Note: 5 or more of one kind take rate per 10.

Foreground—*Sedum alba* and *Sedum acre*

Ten Splendid Climbing Roses

Aviateur Bleriot. Exquisite buds of saffron yellow shaded apricot.

\$1.00 each. \$9.00 per ten.

Climbing American Beauty. Rich carmine blossoms. A very satisfactory variety.

75¢ each. \$6.50 per ten.

Crimson Rambler. Deep crimson flowers.

75¢ each. \$6.00 per ten.

Dr. Van Fleet. Deep flesh pink, glossy foliage.

75¢ each. \$6.00 per ten.

Dorothy Perkins. Shell pink.

75¢ each. \$6.00 per ten.

Excelsa. Double crimson flowers; good foliage.

75¢ each. \$6.00 per ten.

Mary Wallace. Offered last year for first time. Flowers are semi-double of bright clear rose pink, with salmon at base of petals.

\$1.50 each. \$14.00 per ten.

Pauls Scarlet Climber. Rich vivid scarlet. New variety three years ago, becoming more popular all the time.

\$1.00 each. \$9.00 per ten.

Silver Moon. Semi-double pure white flowers; glossy foliage.

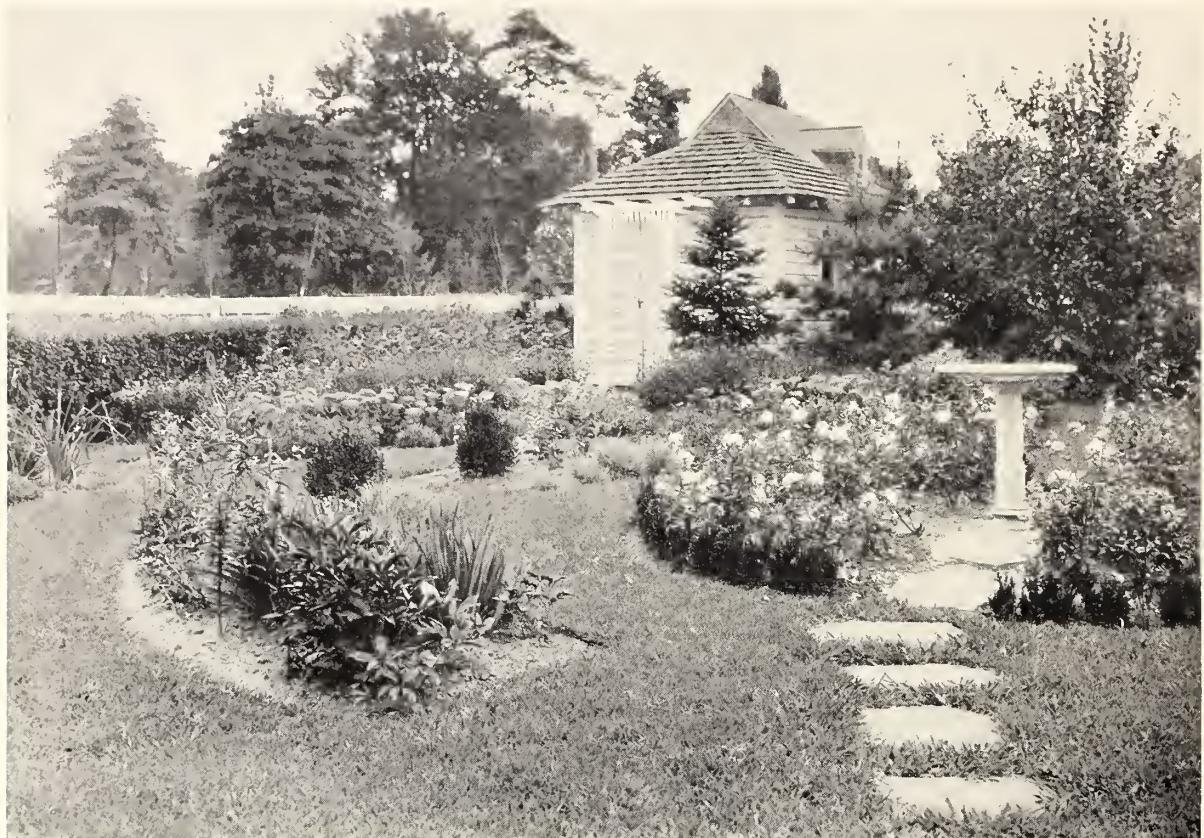

75¢ each. \$6.00 per ten.

Tausendschon. Large trusses pink blossoms.

75¢ each. \$6.00 per ten.

And other varieties as well. Consult our price list for rates on 40 or more of one kind.

Remember that a rose or two planted this year will give you beauty for several years to come.

A small Rose and Perennial garden

Hybrid Roses

Few plants are more popular than Roses. Care should be taken however to select the varieties that are hardiest and best. The following lists of Hybrid Tea and Hybrid Perpetual Roses contain a number of varieties that we have found most satisfactory in our own vicinity.

The Hybrid Tea Roses bloom continuously throughout the summer. They are not absolutely hardy and the soil should be banked well around them each fall. The Hybrid Perpetual roses are more hardy, but their blooming period is confined to three or four weeks. The roses that we offer are strong first class 2 year old budded plants, and our price for these is **\$1.00** each, five or more of one kind **90¢** each. We will furnish ten or more plants of our own selection **90¢** each. After the buds begin to break out, we shall furnish only potted plants of the same stock at **\$1.25** each, 5 or more at **\$1.15** each.

Hybrid Perpetual Roses

Baroness Rothschild. Dainty pink in color. It is of a large size symmetrical form as well as very fragrant. Each rose seems to be set off with individual foliage which gives it a prominence of its own.

Frau Karl Druschki. Its flowers are pure snow white unshaded and sometimes reaching almost six inches in diameter. The plant grows strongly and vigorously and is one of the necessities of any good rose garden.

General Jacqueminot. Commonly known as the Jack Rose with its brilliant scarlet crimson flowers which are large, full, globular and fragrant.

George Dickson. Large full and fragrant blooms of deep velvety crimson which do not turn blue.

Magna Charta. Large flowers of rosy pinkish carmine carrying heavy fragrance and freely produced on good plants. An old favorite.

Paul Neyron. One of the largest roses under cultivation. Its exceedingly fragrant flowers are clear pink shaded with soft rose.

Prince Camille de Rohan. Dark maroon or blood red blooms of unique color effect on moderately vigorous plants.

Ulrich Brunner. Large flowers of light clear red tending toward scarlet showing a shade peculiarly its own.

Hybrid Tea Roses

British Queen. Buds which show a slight pink flush opening to a pure white. They are of good size and fine fragrance and are vigorous and profuse blooming plants.

Columbia. A fine rose producing buds of a lively and beautiful pink which becomes brighter and more intense as the blooms mature. The plants are vigorous and free flowering.

Duchess of Wellington. Large well formed buds opening to semi-double saffron yellow flowers, stained with crimson and changing to lighter yellow.

Edward Mawley. This rose is a standard in its sort with its perfectly formed flowers of deep blackish crimson.

Etoile de France. Flowers velvety crimson and stiff erect stems, cup form and very fragrant.

General MacArthur. Bears large full and well shaped flowers of velvety scarlet shading to bright crimson and produced abundantly on strong growing plants.

Gruss an Teplitz. Stands at the top of the list as a positively dependable rose anywhere in America because of its many beautiful clear crimson scarlet flowers from early June until frost.

J. J. L. Mock. Flowers extra large and well shaped varying from bright cherry red on the outside of the broad petals to a silvery white inside.

K. A. Victoria. A standard old sort producing large full globular blooms of soft creamy white.

Killarney. A very fine pink rose with long pointed buds opening into large and loose blooms of lovely flesh color shaded white, suffused pink and very fragrant.

Killarney White. A distinct rose similar to the famous Killarney in size, shape and fragrance, but snow white.

Lady Alice Stanley. Large fragrant blossoms of deep coral rose on outside and pale flesh on inside.

La France. Flowers large silvery peach, buds very long, free flowering and fragrant.

Los Angeles. One of the newer roses, producing a continuous succession of long stemmed flowers of beautiful flame pink, shaded with gold at base of petal. Buds are long and pointed and expand into flowers of perfect form. Very fragrant.

Mme. Caroline Testout. Broad petals of satiny rose make up the large rounded flower shaded darker at center and lighter at the edges.

Mrs. Aaron Ward. Long and shapely buds of most attractive quality opening into semi-double cup shaped flowers of deep Indian yellow.

Ophelia. Its blooms are large in size, full and perfect in form and appearance and of attractive light salmon flesh color shading to yellow.

Red Radiance. Similar to Radiance in habit but of a deep red color. Large globular flowers which grow on heavy individual and long stems.

Sunburst. Color rich yellow with orange yellow center, blossoms are large and foliage is of greenish bronze color.

Mme. Edouard Herriot. Vigorous grower, quite hardy, of spreading branching habit of long red thorns, green bronze foliage, coral red bud shaded with yellow and bright rosy scarlet.

Mme. Jules Bouche. Beautiful white flowers, light blush center, fragrant, fine, and among the few definitely reliable white roses, by reason of its beauty, habit and good flowering qualities.

Pharisaer. Flowers of large and full form are produced in rosy white, shading to silvery salmon, on strong and erect branching plants.

Willowmere. Coral red buds which open into rich shrimp pink flowers, shaded yellow in center and toning as they develop into other hues.

When to Plant	Dormant roses should be planted in the early spring, which will insure bloom the first season. Pot grown roses may be transplanted at any time during the spring or summer.
Location	Roses thrive in any rich soil which is well drained, (they will not thrive in a very wet soil). They should always be planted in an open, sunny exposure, giving them all the sunlight possible.
Planting and Pruning	Before planting, the bushes should be pruned somewhat. Most varieties of roses are budded on wild-rose stocks, and should be planted so that the junction of the bud with the stock will be three inches below the level of the soil; firmly tread the earth about the bushes after planting, and thoroughly soak the ground with water, then the following day loosen the top soil of the bed with a rake. We advise a good mulch of coarse strawy-manure about the plants the first season until they are established.
Protection	All Hybrid Roses give better results if protected in the winter. It is well to bank the soil around the stalks of the rose bushes in the late fall. The use of coarse manure, leaves or evergreen boughs, as a light covering about the plants, will accomplish the purpose. This should be removed in the early spring.

A Home Orchard

A Short List of Fruits for the Home Garden

We have selected just a few varieties of fruit trees for those who are limited as to space and want only a few varieties, but want the best selection. We shall be glad to quote you on quantity lots, if you haven't a copy of our spring price list.

Apple Trees

We offer strong 2 and 3 year old apple trees 5 to 7 ft. tall at \$1.25 each. Consult our Spring 1926 price list for fifteen other varieties of trees that we offer at the same price.

Baldwin. The leading commerical apple of the east. Large strong vigorous trees, producing an abundance of large bright red apples with yellowish crisp, tender and very juicy flesh. Ripens in November and will keep through the winter until April or May.

Delicious. Fruit large, somewhat conical in shape, tapering at base into five distinct knobs. Flesh is crisp and juicy, mild in flavor but not too sweet. The tree is hardy and vigorous and the fruit will keep well through winter.

Gravenstein. The tree grows rather large, comes into bearing early and is quite productive.

We can furnish the same varieties as above in Dwarf apple trees at \$1.50 each. Dwarf apple trees produce fruit of the same color, quality and flavor as standard trees. The season of ripening is the same, but dwarf trees come into bearing early, do not grow as tall and the fruit as a rule is larger in size.

Pear Trees

We offer strong 2 and 3 year old trees 5 to 7 ft. tall at \$1.50 each. As this list is but a brief one it does not include a half dozen other desirable varieties as well.

Bartlett. The most popular pear grown, a leader among canning pears and very good for eating. Large golden yellow, with reddish blush on the sunny side. Flesh tender, melting and juicy with a delicious musky flavor.

Beurre Bosc. Probably the best flavored pear of all, very large, having a distinct gourd shape, roundish at the blossom end with a long thin tapering neck. Beautiful golden russet color.

The fruit ripens about middle of September and continues in season until early November. It is of orange yellow color, overlaid with broken stripes of light and dark red.

McIntosh Red. Probably the best eating apple grown, the fruit is very attractive in appearance, of bright deep red color. It is above medium in size, with white firm very crisp flesh, fine grained, tender and juicy.

Yellow Transparent. One of the best of the very early apples, skin smooth waxy, a pale yellowish white in color, probably none better for pies, tarts and apple sauce.

Flesh fine grain, juicy and melting, very delicious and highly flavored.

Seckel. Of small size and peculiar rich juicy flavor, desirable variety for pickling and preserving. The sweetest of all pears and greatly prized as a dessert fruit to eat fresh out of the hand. It is of a russet yellow color with bright red cheek.

Cherry Trees

Strong 2 year old trees 5 to 7 ft. tall \$1.50 each.

Napoleon Bigarreau. By virtue of its large size, handsome appearance and high quality, probably a leading sweet variety. Extremely popular for canning. Color bright red on yellowish background. The flavor is rich and sweet, which, with the abundant juice and firm crackling flesh,

makes it a most delicious cherry for home uses. Ripens in July.

Windsor. The leading late sweet cherry. Very hardy, large dark red, with firm tender juicy flesh.

Peach Trees

One year old trees 4 to 5 ft. tall 75¢ each.

Belle of Georgia. Very large white peach with red cheek, rapid grower and very productive, the flesh is white, firm and of fine flavor.

Champion. Extremely good early peach, very hardy, skin creamy white with red cheek. A perfect free-stone which is a rare thing among the early peaches.

Crawford's Early. Very large yellow with a fine red cheek. Flesh yellow, melting, sweet, rich and very excellent. Tree hardy and vigorous.

Crawford's Late. Very large yellow with dark

red cheek, flesh deep yellow, red at the stone, juicy and excellent, with very rich and excellent vinous flavor. One of the finest of latest sorts.

Rochester. The new Rochester peach is the highest quality and the best flavored that has yet been introduced. It is one of the earlier varieties, ripens along with Early Crawford and Elberta. It is very large with sweet tender yellow flesh, rich and excellent.

Don't forget we have a number of other fine varieties as well.

Plum Trees

Strong 2 year old trees 5 to 7 ft. \$1.50 each.

Abundance. Beautiful lemon yellow ground, nearly overspread with bright cherry and with a heavy bloom. Large to very large oblong, tapering to the point. Flesh orange yellow, melting, rich and highly perfumed. Abundant and annual bearer.

We have other plums to offer, but Abundance and Burbank are in more demand than any of the others.

Grape Vines

3 year old vines 60¢ each.

Concord. The leading commercial grape, very productive, bearing bunches of berries of fair size, glossy black with an abundant bloom and good quality. Ripens the last of September.

Worden. A seedling of the Concord and while its berries and bunches are larger, does not keep so well. Is a superior variety for home use. Ripens one or two weeks earlier than Concord.

Delaware. A rich and delicately flavored red grape. An exceptionally desirable variety for home gardens, very hardy, ripens about the last of September.

Niagara. The leading commercial white grape, bunches and berries large and handsome, compact and of good quality, vines vigorous, hardy and very productive, ripens with Concord about the last of September.

Strawberry Plants

Marshall. This strawberry is planted more than any other variety (at least it is in our section) and is a splendid midseason berry. 25 runner plants for 75¢; 25 potgrown plants for \$2.50.

Progressive. One of the most desirable of the everbearing varieties, a strong grower, producing medium large dark red berries of delicious flavor. 25 runner plants for \$1.00; 25 potgrown plants for \$2.50.
